

Guide to Immunization Requirements in Oklahoma - 2015-16 School Year

Please read the bullets below for essential information.

	CHILDCARE Up-to-date for age	PRE-SCHOOL PRE-KG	KG-6th	7th - 11th	12th
VACCINES	Total doses		Total doses		
DTaP (diphtheria, tetanus, pertussis)	4 DTaP		5 DTP/DTaP★	1 Tdap booster	No additional doses are required
PCV (pneumococcal conjugate vaccine)	1-4 PCV◆	PCV is required for ch	ildren in child care only.		
IPV/OPV (inactivated polio/oral polio)	3 IPV/OPV		4 IPV/OPV◀	No additional doses are required once a child has completed the required number of doses. If a	
MMR (measles, mumps, rubella)	1 MMR		2 MMR		
Hib (<i>Haemophilus influenzae</i> type b)	1-4 Hib♦● Hib is required for children in child care only.		child or student has not completed all of the required doses by the time they enter pre-school,		
HepB (hepatitis B)	3 НерВ		3 HepB■	kindergarten, or any grade above kindergarten,	
HepA (hepatitis A)	2 HepA		the doses must be completed on schedule.		
Varicella (chickenpox)	1 Varicella				

- ★ If the 4th dose of DTP/DTaP is administered on or after the child's 4th birthday, then the 5th dose of DTP/DTaP is not required.
- ◆ The number of doses of PCV and/or Hib may range from 1 to 4 depending on the age of the child when the first dose was given.
- If the 3rd dose of IPV/OPV is administered on or after the child's 4th birthday, then the 4th dose of IPV/OPV is not required.
- Children may be complete with 3 or 4 doses of Hib vaccine depending on the brand of vaccine used.
- Students 11 through 15 years of age who have not received HepB vaccine may receive a 2 dose series of Merck® Adult Hepatitis B vaccine to comply with this requirement. All other children (younger or older) must receive 3 doses of pediatric hepatitis B vaccine.
- The table above lists the vaccines that are <u>required</u> for children to attend childcare, preschool, and kindergarten through twelfth grade in Oklahoma. Additional vaccines may be <u>recommended</u>, but are <u>not required</u>. For example, a 2nd dose of varicella vaccine is recommended before entering kindergarten, but not required by Oklahoma law.
- Children attending licensed childcare facilities must be up-to-date for their age for the vaccines listed in the "Childcare" column. Refer to this web page for information on when doses are due for children attending childcare: http://www.ok.gov/health/Disease, Prevention, Preparedness/Immunizations/Vaccines for Childcare/index.html.
- Hib and PCV vaccines are not required for students in pre-school, pre-kindergarten, or kindergarten programs operated by schools unless the facility is a licensed child care facility. Hib and PCV vaccines are required for children attending licensed child care facilities.
- Doses administered 4 days or less, before the minimum intervals or ages, are counted as valid doses.
- The first doses of measles, mumps and rubella (MMR), varicella, and hepatitis A vaccines must be administered on or after the child's first birthday (or within 4 days before the birthday) or they must be repeated.
- For doses given on or after Jan. 1, 2003, the 5th dose of DTaP must be given on or after the 4th birthday (or within 4 days before the 4th birthday). This rule does not apply to doses given before 2003.
- If a parent reports that their child had chickenpox disease, the child is not required to receive varicella vaccine.
- It is not necessary to restart the series of any vaccine if a dose was given late or if a dose is past due. Longer than recommended intervals between doses do not affect final immunity.
- Children may be allowed to attend school and childcare if they have received at least one dose of all the required vaccines due for their age <u>and</u> the next doses are not yet due, <u>but they must complete the remaining doses of vaccine on schedule</u>. These children are "in the process" of receiving immunizations.
